**Clearwater Masterclass Series**

**November 2018**

**Melbourne CBD**

Clearwater’s Masterclass Series: Building the capacity of professionals across Victoria to deliver resilient and liveable cities and towns through integrated place-based planning.

Join Clearwater and Monash Sustainable Development Institute to explore best practice in Integrated Water Management (IWM) and practical skills to build support and drive successful projects. These interactive masterclasses include:

<table>
<thead>
<tr>
<th>Masterclass 1: Planning for resilient and liveable cities and towns</th>
<th>Masterclass 2: Building a successful business case</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thu 8 November</td>
<td>Thu 15 November</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Masterclass 3: Collaboration – within and outside your organisation</th>
<th>Masterclass 4: Communication and influence</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thu 22 November</td>
<td>Thu 29 November</td>
</tr>
</tbody>
</table>

**Audience:** Suitable for practitioners, senior officers, and managers, particularly those working in Strategic and statutory planning, Stormwater management, Sustainability and liveability, Urban design and landscape architecture, Environment / waterway management, and Water / wastewater infrastructure planning

**About Clearwater**

Clearwater provides training and capacity building programs to strengthen skills, knowledge and networks and support the implementation of Integrated Water Management. We provide training, tours, events, online resources and build partnerships across the water sector. The program is currently hosted and co-funded by Melbourne Water and the Department of Environment, Land, Water and Planning (DELWP).
