*Clearwater’s Masterclass Series: Building the capacity of professionals across Victoria to deliver resilient and liveable cities and towns through integrated place-based planning.*

Join Clearwater and Monash Sustainable Development Institute to explore best practice in Integrated Water Management (IWM) and practical skills to build support and drive successful projects for your region. These interactive and locally relevant masterclasses include:

<b>Masterclass 1:</b> Planning for resilient and liveable cities and towns	<b>Masterclass 2:</b> Collaboration – within and outside your organisation
<b>Masterclass 3:</b> Building a successful business case	<b>Masterclass 4:</b> Communication and influence

## Masterclass 2: Collaboration – within and outside your organisation

Optimising social, environmental and economic benefits amidst increasingly complex social and environmental pressures and rapidly changing technologies can no longer be achieved by a single profession or organisation. Addressing this complexity requires individuals to work collaboratively within and across organisations to deliver collective benefits for communities, organisations and the environment. Good collaboration skills are key for successful professionals in this new context.

### Outline of session

- Stakeholder mapping and needs analysis
- Collaborating across disciplines, levels and organisations
- How to navigate organisational and institutional structures and governance
- Strategies to foster collaboration within and across organisations

### Who should attend?

Practitioners, senior officers and managers, particularly those working in:

- Strategic and statutory planning
- Stormwater management
- Sustainability and liveability
- Urban design and landscape architecture
- Environment / waterway management
- Water / wastewater infrastructure planning

### The benefits of attending

- Identify your relevant stakeholders and understand their needs in order to deliver mutually beneficial outcomes
- Increase your capacity to deliver greater benefits to your organisation and the community
- Strengthen your ability to navigate organisational and institutional structures
- Learn from examples of successful multi-stakeholder collaboration
- Increase your awareness of your personal approach to collaboration
- Strengthen your regional networks and connect with key individuals involved in IWM planning.

### Expert speakers

**Dr Annette Bos, Deputy Director, Education, Monash Sustainable Development Institute**  
Annette leads the Sustainable Development Education Program at MSDI. Annette has extensive experience and expertise in coordination, design, development and delivery of innovative educational programs with a focus on sustainable development and water management.

**Dirk Visser, Lecturer, Monash Sustainable Development Institute (MSDI)**

Dirk is a lecturer at MSDI, with a specific focus on executive education. Dirk has nearly 10 years’ experience in helping individuals and organisations identify, make sense of and respond to the sustainability challenges they face.
